## IN THE CLAIMS

- 1. (Currently Amended) A <u>computer-implemented</u> method for creating a presentation, comprising the steps of:
  - (a) receiving, by a goal based learning system, information indicative of a goal;
  - (b) integrating information that motivates accomplishment of the goal for use in the presentation;
  - (c) evaluating progress toward the goal and providing feedback that further motivates accomplishment of the goal; and
  - (d) managing the presentation of information around specific requirements designed to achieve the goal.
- 2. (Currently Amended) A <u>The computer-implemented</u> method for creating the a presentation as recited in claim 1, wherein the requirements include direct linkages to remedial educational presentations.
- 3. (Currently Amended) A The computer-implemented method for creating the a presentation as recited in claim 1, wherein the requirements include limits that prohibit access to sections of the a presentation until the goal is obtained.
- 4. (Currently Amended) A <u>The computer-implemented</u> method for creating <u>the</u> a presentation as recited in claim 1, including the step of limiting access to sections of <u>the</u> a presentation until appropriate prerequisites are completed.
- 5. (Currently Amended) A The computer-implemented method for creating the a presentation as recited in claim 1, including the step of providing feedback that identifies a navigation path for a student based on the goal.
- 6. (Currently Amended) A <u>The computer-implemented</u> method for creating <u>the a</u> presentation as recited in claim 1, including the step of utilizing a student identifier to control access to appropriate presentation material.

- 7. (Currently Amended) A <u>The computer-implemented</u> method for creating <u>the</u> a presentation as recited in claim 1, wherein each item in the presentation is assigned an identifier to provide a level of granularity for restrictive access to presentation material.
- 8. (Currently Amended) A <u>The computer-implemented</u> method for creating <u>the</u> a presentation as recited in claim 1, wherein each activity associated with <u>the</u> a presentation is identified to provide a level of granularity for restrictive access to the activity.
- 9. (Currently Amended) A <u>The computer-implemented</u> method for creating <u>the a</u> presentation as recited in claim 1, including the step of storing a current location for one or more students that tracks the one or more students progress in the presentation.
  - 10. (Currently Amended) An apparatus that creates a presentation, comprising:
    - (a) (b) a processor;
    - (b) (c) a memory that stores information under the control of the processor;
    - (c) logic that receives information indicative of a goal;
  - (d) logic that integrates information that motivates accomplishment of the goal for use in the presentation;
  - (e) logic that evaluates progress toward the goal and providing feedback that further motivates accomplishment of the goal; and
  - (f) (a) logic that manages the presentation of information around specific requirements designed to achieve the goal.
- 11. (Currently Amended) An The apparatus that creates the a presentation as recited in claim 10, wherein the requirements include direct linkages to remedial educational presentations.
- 12. (Currently Amended) An The apparatus that creates the a presentation as recited in claim 10, wherein the requirements include limits that prohibit access to sections of the a presentation until the goal is obtained.
- 13. (Currently Amended) An The apparatus that creates the a presentation as recited in claim 10, including logic that limits access to sections of the a presentation until appropriate prerequisites are completed.

- 14. (Currently Amended) An The apparatus that creates the a presentation as recited in claim 10, including logic that provides feedback that identifies a navigation path for a student based on the goal.
- 15. (Currently Amended) An The apparatus that creates the a presentation as recited in claim 10, including logic that utilizes a student identifier to control access to appropriate presentation material.
- 16. (Currently Amended) An The apparatus that creates the a presentation as recited in claim 10, wherein each item in the presentation is assigned an identifier to provide a level of granularity for restrictive access to presentation material.
- 17. (Currently Amended) An The apparatus that creates the a presentation as recited in claim 10, wherein each activity associated with the a presentation is identified to provide a level of granularity for restrictive access to the activity.
- 18. (Currently Amended) An The apparatus that creates the a presentation as recited in claim 10, including logic that stores a current location for one or more students that tracks the one or more students progress in the presentation.
